FINAL THESIS REVIEW

Thesis type: Master - Diploma

Name and surname of the student: Bc. NOSEK, Ondrej
The supervisor: Prof. Dr.-Ing. habil. Günter.H.Hertel
Topic of the final thesis: „State of the art of ISO 9000 standards conversion into benefits for certain GO or NGO"

1. Difficulty of the thesis in:

Theoretical knowledge		high
Input data and its elaboration		high
Applied methods	standard	high

2. Evaluation of the thesis:

Criterion	Evaluation grade (acc. to SZŘ UP)					
	A	**B**	**C**	**D**	**E**	**F**
Level of reaching the thesis goal(s)	X					
Logical construction of the thesis	X					
Student's work during the topic elaboration		X				
Amount of the student's own contribution in comparison to the amount of taken information		X				
Suitability of applied methods		X				
Work with resources including citations		X				
Layout of the thesis (text, graphs, tables)	X					
Stylistic level, grammaticality	X					
Applicability of the thesis conclusions in practice		X				

(I do understand A=best and F = worse)

3. **Questions** to answer during the defence (eventually remarks of the opponent):
   a. Because the maturity of Non-Profit-Sector reflects the level of civil society, how to characterize Czech civil society?
   b. The number of NGO in Czech Republic is proxi 73.000. What does this indicator say about the importance of the Non-Profit-Sector? Which other indicators would allow a better characterization of the social and economic importance?
   c. Compare Czech republic's NGO sector with other countries in EU!

d. Which operative recommendations have you for the responsibilities in science and education, regional development agencies, etc.

Some **remarks**:
➢ Check, please, the allocations of footers and the source-reference. E.g. page 9, 74, 75
➢ Add the source and quote exactly in chapter 2.4.1, page 31.
➢ Add, please, conclusions (besides summaries) at the end of all main chapters
➢ Complete the quotation of footer 47

4. The thesis has gone through the STAG theses.cz anti-plagiarism control resulting in:
The thesis is not a plagiarism. *(see mail JK 121205)*

5. The thesis is recommended for the defence at January 2013, 24th

6. Suggested classification grade: (In accordance to the evaluation chapter 2): B
