

## **Record of the defence of the diploma thesis**

### **Glory Okojie**

1. Opening – introduction of the student, supervisor and thesis opponent
2. Presentation of the student's diploma thesis:
  - a. Aims of the thesis
  - b. Literature review
  - c. Material and Methods
  - d. Results
  - e. Discussion
  - f. Conclusion
3. Presentation of the supervisor - review
4. Presentation of the opponent - review
5. Answers to opponent's questions
6. Discussion: Discussion about problematics of domestication of crops.  
Discussed the reason for choosing the Afghan land races for study. How common is dormancy of seeds among flowering plants? Relationship between loosing of dormancy and possibility of root infection (susceptibility to diseases) of young plants. There are some pea virus diseases which are transmitted by seeds? May virus seeds diseases influent the quality of dormancy? What do you know about crop species in Nigeria and seed dormancy? Is vivipary common in pea? What Leguminosae are bred in Nigeria? The student responded adequately to the questions.
7. Final evaluation, closing of the defence.

**Classification: B**

Date of defence: 09. 06. 2023
