Student evaluation report

The defendant Mr. Cemal Köprülüoğlu from Turkey started his PhD study in October 2013.

He was among the first students who started in our lab a new project concerning drug design. He successfully passed all required courses during 2014 and 2015.

His short-term research stay was executed in 2016 at the Ege University in Izmir, Turkey and he successfully passed the Final State Exam in 2017.

During the PhD study he presented several oral and poster presentations at international conferences in Europe and North America.

His PhD Thesis entitled "Computer Aided Drug Design" includes 5 articles, where he takes the role of the first author in 2 of them - ChemPhysChem (Including Cover Page and Cover Profile) and J. Mol. Recognition and as the co-author in 3 of them - European Journal of Medicinal Chemistry, J. Mol. Recognition and mini review in ChemPlus Chem. The paper in ChemPhysChem, where he was the first author belong among top the 10% downloaded papers in 2018 and 2019.

His activity is currently devoted to development of new scoring functions and he cooperates in the drug design project with the US pharma company Pfizer.

In Prague, April 30th 2020

Prof. RNDr. Pavel Hobza, DrSc.
Supervisor
