

THESIS DEFENCE EVALUATION

Palacký University Olomouc – Faculty of Physical Culture

Author of the thesis: EUGEN DREČ^V

Thesis title: The impact of subjectively perceived socioeconomic status on lifestyle behaviour and physical activities among youth

Chairperson of the Examination Committee: doc. Mgr. Josef Mitáš, Ph.D.

Thesis defence evaluation:

Points

0-4

1. Student's presentation of the thesis.

2

Evaluation criteria: quality of the presentation, aptness and definition of the key points of the thesis, fluency, factual correctness of the presentation, explaining the possible practical use of the thesis...

2. Responses to questions from thesis reviews and discussion.

2

Evaluation criteria: understanding of the questions, factual correctness, self-action, response fluency, the ability to put facts into context, speech promptness, terminological accuracy...

3. Thesis quality.

1

Evaluation criteria: compliance with the publication standard, formal and graphic appearance of the thesis, contribution to FTK, impact and possibility of practical use, participation in faculty projects...

4. Evaluation of the suggested thesis reviews

1

Evaluation criteria: proposed classification from thesis reviews, the classification depends on the average calculated from both reviews, where final rating is done as follows:
A 4 points, B 3 points, C 2 points, D – E 1 point, F 0 points.

A – average up to 1,25 included
B – average higher than 1,25 and lower or equal to 1,75
C – average higher than 1,75 and lower or equal to 2,25
D – average higher than 2,25 and lower or equal to 2,75
E – average higher than 2,75 and lower or equal to 3,00

6

Total points:

Overall classification of the thesis defence

E

Justification for awarding the grade "F"

(Reason for increasing or decreasing classification by 3 grades compared to thesis opponent's proposal):

Questions asked during the thesis defence:

According to your experience and the literature review, what is specific about your research sample in relation to the factors

affecting the sport and lifestyle compared to Western "developed" countries?

Please explain GINI index
