

Záznam o průběhu obhajoby

Mgr. Sandra Donevska

.....
Aplikovaná matematika

Studijní obor:

.....
Katedra aplikované matematiky, PřF UP v Olomouci

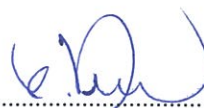

Školící pracoviště:

.....
doc. RNDr. Karel Hron, Ph.D.

Předseda komise:

At the beginning of the defense, Mgr. Donevska presented her thesis about regression analysis for compositional data, focused particularly on total least squares modeling of three-part compositions, covariance-based variable selection and calibration modeling. Then reviewer reports, presented by prof. Peter Filzmoser and prof. Seiza Wimmer, evaluated positively the thesis. In the following discussion Mgr. Donevska answered questions related to convergence issues, and variable selection and calibration. (precision, normality assumptions).
